Manuscript Requirements

OPTICAL SPECTRA welcomes manuscripts from qualified contributors who have new and interesting information to share on subjects related to scientific optics and sophisticated systems—whether it involves design ideas or innovative product developments, theoretical concepts or practical applications. Prospective contributors should first submit an outline of the proposed article for consideration.

Manuscripts should be typed in triplicate, double-spaced on white 8½" x 11" paper, and should be 1,500 to 2,000 words in length. Also required is an abstract, summarizing the article in 75 to 100 words, and 50 to 75 words of autobiographical information about the author, accompanied by a glossy photograph. Photographs accompanying articles should be 8" x 10", glossy and unmarred; line drawings should be on white paper with clearly drawn black lines for good reproduction. Bibliographical references should list: name of author; name of source; page number; and date of publication.
